

# ENVIRONMENTAL CHARTER

**WE STRIVE FOR REDUCING THE IMPACT OF OUR ACTIVITIES ON ENVIRONMENT  
AND PARTICULARLY OUR CARBON FOOTPRINT**

## ENVIRONMENTAL RISKS

We fight against pollution by:

- Treating liquid effluents
- Recovering solid wastes
- Identifying sources of Greenhouse Gas emission alongside the value chain, and evaluating them while implementing an improvement and reduction plan
- Rationally using crop protection products and other chemicals.

## ENERGY AND NATURAL RESOURCES

Rationally using resources by reducing their consumption, namely water, energy, and any other natural resource in industrial, agricultural, and domestic environment.

## ADAPTATION TO CLIMATE CHANGE

Fighting against Global Warming by reducing emissions and increasing sequestration to improve carbon balance.

Regularly assessing our carbon

## PRESERVATION OF BIODIVERSITY

The following rules are established:

- To consider the preservation of biodiversity in dealing with industrial and local farmers' plantations
- To commit to Zero Deforestation while implementing the Group's policy
- To fight against poaching, felling of forest species, forest fires and illegal mining
- To give priority to the development of fallow land
- To respect HCV and HCS, implement and preserve buffer zones.
